

BARRIERS TO FRESH FOOD ACCESS GROCERY SHOPPING OVERVIEW

Rhonda S. Vesey♥, Jean-Daniel M. Saphores♣, Anne C. Bellows♦, Sabah Hossain Iqra♣ (2026)

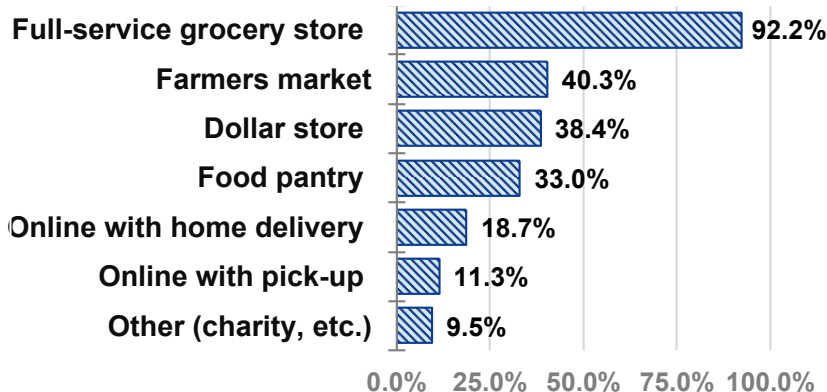

Food Access Healthy Neighborhoods Now! (FAHNN)♥, the University of California, Irvine♣, and Syracuse University♦ partnered to understand grocery shopping patterns, food security, barriers to fresh food access, and residents' priorities to overcome these barriers in Syracuse, NY. **This brief summarizes results about grocery shopping from the survey we conducted October-December 2025.**

What 476 Syracuse-area residents told us about their household grocery shopping

THE BIG PICTURE from our respondents:

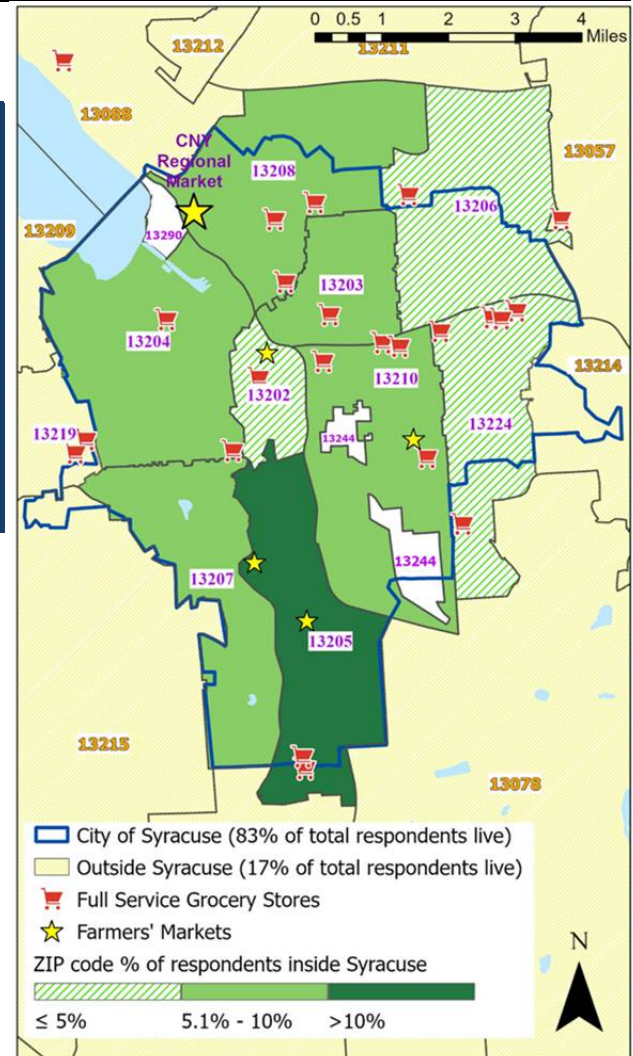

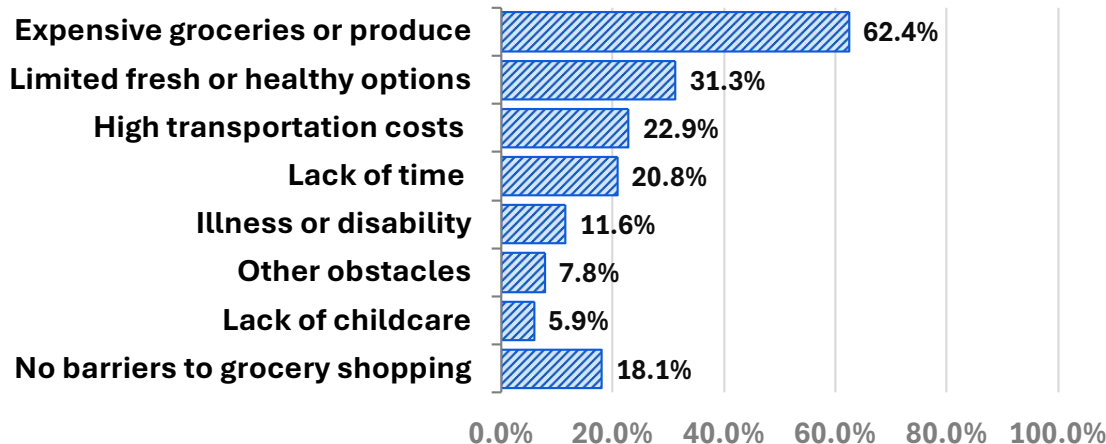

92.2% use full-service grocery stores
59% would like a neighborhood farmers market
46% spend less than \$100/week on groceries; only 9% spend over \$100/week on eating out
62.4% say cost is the main barrier; 31.3% say limited fresh or healthy options are the second barrier

How our respondents grocery shop

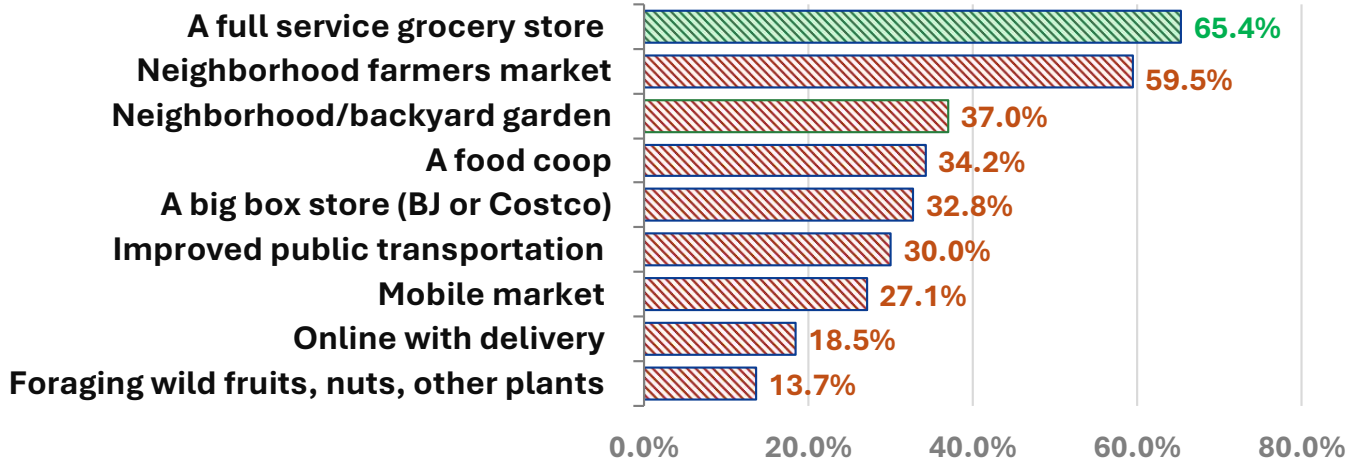

Key barriers to grocery shopping

1. Affordability; 2. Poor access to stores with fresh & healthy foods; 3. Transportation costs

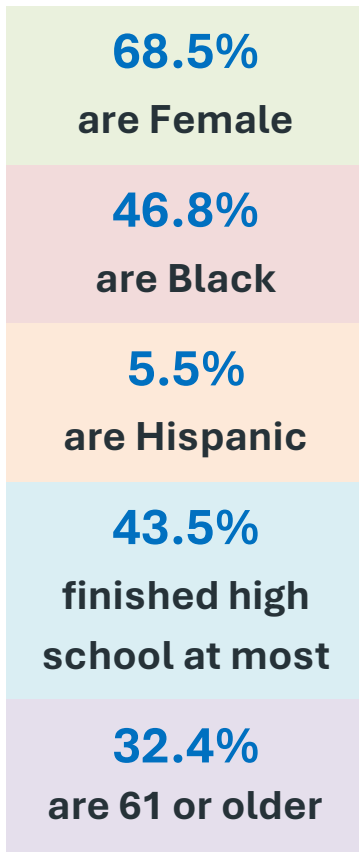

What respondents said would help them access fresh food

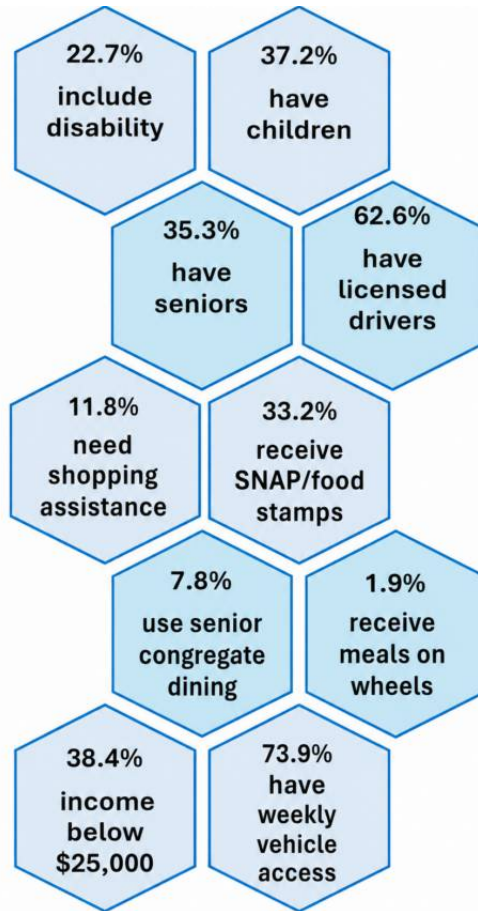

Alternatives to full service grocery stores
